

PRICING STRUCTURE FOR DESIGNING AND BUILDING BUSINESS ONTOLOGIES

We are happy to bring our comprehensive Designing and Building Business Ontologies (DBBO) course to your organization, allowing you to offer your team the knowledge they need to take your Semantic Technology initiatives to the next level.

IN-HOUSE PRICING

We understand that it can be difficult to get everyone in one room for an entire day, let alone four. Therefore, our in-house pricing is determined on a per-day basis. For example, you could book us every other Friday at your location for a few weeks until the course is completed, if necessary.

You can select any or all of the modules (days) for presentation. However, you receive a discount for committing to multiple days at the same time and an additional discount for making the days contiguous. For example, if we do four days of training in four consecutive days (\$32,000), the fee will be less than if we make four separate trips (\$41,000). See the table below for a complete outline of per-day pricing.

TRAINING COST BY NUMBER OF DAYS (IN HOUSE)				
1	2	3	4	Number of Trips
8,000	16,000	24,000	32,000	1
	17,000	26,000	35,000	2
		28,000	38,000	3
			41,000	4

Out-of-pocket expenses for airfare, lodging, transportation, and a meal allowance will be in addition to the fees shown above. For groups of ten and fewer, we will have one instructor; for larger groups we will have two instructors (same course cost, but additional out-of-pocket expenses).

Please feel free to contact us with questions about pricing and scheduling: (970) 490-2224 or dbbo@semanticarts.com.

Note: Class size will be limited to 20, except for the first day for which there is no set limit.
